

# Sophia Tsivoula

## Career Profile

I am a passionate Junior Web Developer and Researcher interested in modern web technologies and medical applications. Personally enjoy volunteering and work with large groups of people. I am able to communicate with both technical and not technical colleagues and I am able to make critical decisions for the benefit of many. I can be described as hard working, reliable and resourceful in demanding projects.

## Experience

### Web Development

Lingua Technis

2019 - 2020

Developed a personalized multilingual CV for translation services using WordPress. The personalized CV contained, besides general information about the client, a contact page, a list of the services the client could offer and the option to send via email document for translation on both German and English.

### Research

Ionian University

2019 - Present

Presented a scientific paper called "An application for exploring visual perception. A pilot neuroeducational study." And presented it in GeNeDis 2020 (Worldwide congress). The application's goal was the neuroeducation of the human brain for individual with cognitive difficulties. The users had to observe an image for a few seconds and recreate it from memory on an empty canvas using their mobile device.
